**CERTIFIED MAIL
RETURN RECEIPT REQUESTED**

RE: Virginia Water Protection (VWP) Individual Permit Number 08-1822
Lowes Island Golf Club, Loudoun County, Virginia
Approval of Request for Minor Modification (Change in Ownership)

Dear Mr. Trump:

The Virginia Department of Environmental Quality (DEQ) has received your Change in Ownership request for the VWP Individual Permit Number 08-1822, issued on February 4, 2009.

In accordance with your request, and pursuant to the VWP Permit Program Regulation 9 VAC 25-210-210 and § 401 of the Clean Water Act Amendments of 1977, Public Law 95-217, DEQ approves the Change in Ownership as noted below:

Former Owner: Lowes Island Golf Club,
20391 Lowes Island Boulevard, Sterling, Virginia 20165

New Owner: Trump National Golf Club Washington DC LLC,
725 Fifth Avenue, New York, New York 10022

DEQ has determined that this request qualifies for a Minor Modification in accordance with VWP Permit Program Regulation 9 VAC 25-210-180.F.4. The permit cover page of the VWP Individual Permit No. 08-1822 has been modified to reflect the Minor Modification.

If you have any questions, please contact Amy Dooley at 703-583-3905 or aedooley@deq.virginia.gov.

Respectfully,

Thomas A. Faha
Regional Director

Minor Modification Date: April 13, 2009

Expiration Date: February 3, 2024

VIRGINIA WATER PROTECTION PERMIT ISSUED PURSUANT TO THE STATE WATER CONTROL LAW AND SECTION 401 OF THE CLEAN WATER ACT

Based upon an examination of the information submitted by the owner, and in compliance with § 401 of the Clean Water Act as amended (33 USC 1341 et seq.) and the State Water Control Law and regulations adopted pursuant thereto, the State Water Control Board (board) has determined that there is a reasonable assurance that the activity authorized by this permit, if conducted in accordance with the conditions set forth herein, will protect instream beneficial uses and will not violate applicable water quality standards. The board finds that the effect of the impact, together with other existing or proposed impacts to surface waters, will not cause or contribute to a significant impairment to state waters or fish and wildlife resources.

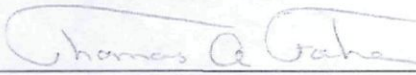

Permittee: Trump National Golf Club Washington DC LLC

Address: 725 Fifth Avenue, New York, New York 10022

Activity Location: The intake for the water withdrawal is located at the Lowes Island Golf Club, which is located at 20391 Lowes Island Boulevard in Loudoun County, Virginia.

Activity Description: This permit authorizes the operation of a water withdrawal from the Potomac River, using temporary intake equipment, for the purpose of filling ponds to irrigate 190 acres of the Lowes Island Golf Club's golf course located at the "Lowes Island Golf Club" in Loudoun County, Virginia. The permit authorizes the water withdrawal of no more than 0.22 million gallons per day, no more than 6.6 million gallons per month and no more than 80 million gallons per year.

The permitted activity shall be in accordance with this Permit Cover Page, Part I - Special Conditions, and Part II - General Conditions.

Thomas A. Faha, Regional Director

Change of Ownership Agreement Form

RE: Change of Ownership - VWP Permit No. 08-1822

Name of permitted facility: Lowes Island Golf Club
Loudoun County

TO: Virginia Department of Environmental Quality

We, the undersigned, hereby request a transfer of ownership for the referenced permit.
Anticipated date of transfer: May 1, 2009.

CURRENT OWNER: I (We) hereby agree to the transfer of ownership modification to the referenced VWP Permit, contingent upon the transfer of the facility to the New Owner.

Current Owner name as listed on the VWP Permit Cover Page: Lowes Island Golf Club

Lowes Island Golf Club
By: Bondy Way Development Corporation

Signed: [Signature] Date: March 30, 2009

Printed Name: Guy F. Campbell, III Title: Vice President

Address: 7501 Wisconsin Avenue, 9th Floor West Tower, Bethesda, MD 20814

Telephone: (240) 497-7330

NEW OWNER: I (We) hereby agree to the change of ownership modification to the referenced VWP Permit, and agree to accept all conditions and responsibilities of the permit, contingent upon the transfer of the facility to the New Owner.

Transferred permit to be issued to: Trump National Golf Club Washington DC LLC

Signed: [Signature] Date: March 2, 2009

Printed Name: Eric Trump Title: Vice President

Address: 725 Fifth Avenue, New York, NY 10022

Attention: Nandini R. Wilcke, Esquire

Telephone: (212) 836-3216

This form must be signed by properly authorized individuals as specified in the VWP Permit Regulation.

Expiration Date: February 3, 2024

VIRGINIA WATER PROTECTION PERMIT ISSUED PURSUANT TO THE STATE WATER CONTROL LAW AND SECTION 401 OF THE CLEAN WATER ACT

Based upon an examination of the information submitted by the owner, and in compliance with § 401 of the Clean Water Act as amended (33 USC 1341 et seq.) and the State Water Control Law and regulations adopted pursuant thereto, the State Water Control Board (board) has determined that there is a reasonable assurance that the activity authorized by this permit, if conducted in accordance with the conditions set forth herein, will protect instream beneficial uses and will not violate applicable water quality standards. The board finds that the effect of the impact, together with other existing or proposed impacts to surface waters, will not cause or contribute to a significant impairment to state waters or fish and wildlife resources.

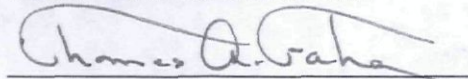

Permittee: Lowes Island Golf Club

Address: 20391 Lowes Island Boulevard, Sterling, Virginia 20165

Activity Location: The intake for the water withdrawal is located at the Lowes Island Golf Club, which is located at 20391 Lowes Island Boulevard in Loudoun County, Virginia.

Activity Description: This permit authorizes the operation of a water withdrawal from the Potomac River, using temporary intake equipment, for the purpose of filling ponds to irrigate 190 acres of the Lowes Island Golf Club's golf course located at the "Lowes Island Golf Club" in Loudoun County, Virginia. The permit authorizes the water withdrawal of no more than 0.22 million gallons per day, no more than 6.6 million gallons per month and no more than 80 million gallons per year.

The permitted activity shall be in accordance with this Permit Cover Page, Part I - Special Conditions, and Part II - General Conditions.

Thomas A. Faha, Regional Director

02-04-09
Date

Part I – Special Conditions

A. Authorized Activities

1. This permit authorizes the operation of a water withdrawal from the Potomac River for the purpose of filling ponds to irrigate 190 acres of the Lowes Island Golf Club's golf course. The location of the water intake is as indicated on the U.S. Geologic Survey Quadrangle Map for Sterling provided in the application dated September 18, 2008 and received on September 22, 2008. The authorized activities shall be in accordance with the application dated September 18, 2008 and received September 22, 2008, and additional information submittal dated October 9, 2008 and received October 10, 2008. The application was deemed complete by DEQ on October 10, 2008.
2. The withdrawal of surface water from the Potomac River shall not exceed a daily withdrawal amount of 0.22 million gallons, shall not exceed a monthly withdrawal amount of 6.6 million gallons and shall not exceed 80 million gallons of water per year.

B. Permit Term

This permit is valid for **fifteen (15) years** from the date of issuance. A new permit may be necessary for the continuance of the authorized activities or any permit requirement that has not been completed, including compensation provisions. A new permit may be necessary for the continuance of the authorized activities. The permit term shall not exceed 15 years.

C. Standard Project Conditions

1. The activities authorized by this permit shall be executed in such a manner that any impacts to stream beneficial uses are minimized. As defined in § 62.1-10(b) of the Code, "beneficial use" means both instream and offstream uses. Instream beneficial uses include, but are not limited to, the protection of fish and wildlife habitat, maintenance of waste assimilation, recreation, navigation, and cultural and aesthetic values. Offstream beneficial uses include, but are not limited to, domestic (including public water supply), agricultural, electric power generation, commercial, and industrial uses. Public water supply uses for human consumption shall be considered the highest priority.
2. Flows downstream of the project area shall be maintained to protect all uses.
3. Measures shall be employed at all times to prevent and contain spills of fuels, lubricants, or other pollutants into surface waters.
4. Withdrawal machinery or heavy equipment in or near surface waters shall be placed on mats or geotextile fabric, or other suitable means shall be implemented, to minimize soil disturbance to the maximum extent practical. Mats, fabrics, or other measures shall be removed as soon as the water withdrawal activity is complete.
5. Virginia Water Quality Standards shall not be violated in any surface waters as a result of the project activities.

6. All required notifications and submittals shall include project name and permit number and be submitted to the DEQ office stated below, to the attention of the VWP permit manager, unless directed in writing by DEQ subsequent to the issuance of this permit: Department of Environmental Quality-Northern Regional Office, 13901 Crown Court, Woodbridge, Virginia 22193.

D. Surface Water Withdrawals

1. The withdrawal of surface water from the Potomac River shall not exceed a daily withdrawal amount of 0.22 million gallons, shall not exceed a monthly withdrawal amount of 6.6 million gallons and shall not exceed 80 million gallons of water per year.
2. The permittee shall monitor water withdrawals from the Potomac River on each day that a water withdrawal occurs to confirm that the withdrawals are in compliance with the special conditions of this permit.
3. In the event that the Governor of Virginia or the Virginia Drought Coordinator declares a drought emergency in the Northern Virginia Drought Evaluation Region of Fauquier, Loudoun, Prince William, Arlington and Fairfax Counties, the permittee shall implement the mandatory conservation measures, as detailed in Attachment A of this permit. The permittee shall be responsible for determining when drought emergencies are declared. DEQ may require documentation that mandatory conservation measures were implemented during declared drought emergencies.
4. The permittee shall reduce withdrawals, as instructed by DEQ, when the restriction or emergency stage is declared in the Washington Metropolitan Area under the provisions of the Potomac Low Flow Allocation Agreement or when the operating rules outlined by the Drought-Related Operations Manual for the Water Supply Coordination Agreement are in effect.
5. In times when surface water withdrawals are curtailed in accordance with Part I.D.4., the permittee shall manage available water resources including the suspension of watering fairways, greens, and tees as necessary to comply with limits set forth by Part I.D.4.
6. To prevent the impingement and entrainment of fish eggs, larvae, and other aquatic life, the intake screens shall be so designed that screen openings are not larger than 1 millimeter in width and the screen face intake velocities are not greater than 0.25 feet per second.

E. Monitoring

1. On each day that a water withdrawal occurs, the permittee shall record the following information:
 - a. The location of the placement of the water withdrawal intake,
 - b. The name and contact information of the person recording the data and operating the pump,
 - c. The pump capacity and pump rate (in gallons per minute) at which the pump is being operated,

- d. The date and time that the pump was turned on and off, and
- e. The amount of water withdrawn.

F. Reporting

1. Water withdrawals shall be reported to DEQ-NRO by January 31st of the next year, as required under State Water Control Board Water Withdrawal Reporting Regulation (9 VAC 25-200 et seq.). The annual monitoring report shall contain the following information: the data collected in accordance with outlined in Part I.E.1, the permittee's name and address, the sources and locations of water withdrawal, the cumulative volume of water withdrawn each month of the calendar year, the maximum day withdrawal and the month in which it occurred, and the method of withdrawal measurement. *For permittee's subject to the Virginia Department of Health (VDH) Waterworks Regulations*, the annual reports to DEQ may include, as an alternative, the source and location of water withdrawals, the type of use for the water withdrawn, and reference to the reports filed with VDH that contain the monthly withdrawal data.
2. All reports required by this permit and other information requested by DEQ shall be signed by the permittee or a person acting in the permit tee's behalf, with the authority to bind the permittee. A person is a duly authorized representative only if *both* criteria below are met. If a representative authorization is no longer valid because of a change in responsibility for the overall operation of the facility, a new authorization shall be immediately submitted to DEQ.
 - a. The authorization is made in writing by the permittee.
 - b. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of plant manager, superintendent, or position of equivalent responsibility. A duly authorized representative may thus be either a named individual or any individual occupying a named position.
3. All submittals shall contain the following signed certification statement:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."
4. Any fish kills or spills of fuels or oils shall be reported to DEQ immediately upon discovery at (703) 583-3800. If DEQ cannot be reached, the spill shall be reported to the Virginia Department of Emergency Management (DEM) at 1-800-468-8892 or the National Response Center (NRC) at 1-800-424-8802.

5. DEQ shall be notified in writing within 24 hours or as soon as possible on the next business day when potential environmentally threatening conditions are encountered which require debris removal or involve potentially toxic substances. Measures to remove the obstruction, material, or toxic substance or to change the location of any structure are prohibited until approved by DEQ.
6. All records and information that result from the monitoring and reporting activities required by this permit, including any records of maintenance activities to the withdrawal system, shall be retained for the life of the permit. This period of retention shall be extended automatically during the course of any unresolved litigation regarding the regulated activity or as requested by the State Water Control Board.

Part II – General Conditions

A. Duty to Comply

The permittee shall comply with all conditions of the VWP permit. Nothing in the VWP permit regulations shall be construed to relieve the permittee of the duty to comply with all applicable federal and state statutes, regulations and prohibitions. Any VWP permit violation is a violation of the law, and is grounds for enforcement action, VWP permit termination, revocation, modification, or denial of an application for a VWP permit extension or reissuance.

B. Duty to Cease or Confine Activity

It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the activity for which a VWP permit has been granted in order to maintain compliance with the conditions of the VWP permit.

C. Duty to Mitigate

The permittee shall take all reasonable steps to minimize or prevent any impacts in violation of the permit which may have a reasonable likelihood of adversely affecting human health or the environment.

D. VWP Permit Action

1. A VWP permit may be modified, revoked and reissued, or terminated as set forth in 9 VAC 25-210 et seq.
2. If a permittee files a request for VWP permit modification, revocation, or termination, or files a notification of planned changes, or anticipated noncompliance, the VWP permit terms and conditions shall remain effective until the request is acted upon by the board. This provision shall not be used to extend the expiration date of the effective VWP permit. If the permittee wishes to continue an activity regulated by the VWP permit after the expiration date of the VWP permit, the permittee must apply for and obtain a new VWP permit or comply with the provisions of 9 VAC 25-210-185 (VWP Permit Extension).

VWP permits may be modified, revoked and reissued or terminated upon the request of the permittee or other person at the board's discretion, or upon board initiative to reflect the requirements of any changes in the statutes or regulations, or as a result of VWP permit noncompliance as indicated in the Duty to Comply subsection above, or for other reasons listed in 9 VAC 25-210-180 (Rules for Modification, Revocation and Reissuance, and Termination of VWP permits).

E. Inspection and Entry

Upon presentation of credentials, any duly authorized agent of the board may, at reasonable times and under reasonable circumstances:

1. Enter upon any permittee's property, public or private, and have access to, inspect and copy any records that must be kept as part of the VWP permit conditions;
2. Inspect any facilities, operations or practices (including monitoring and control equipment) regulated or required under the VWP permit; and
3. Sample or monitor any substance, parameter or activity for the purpose of ensuring compliance with the conditions of the VWP permit or as otherwise authorized by law.

F. Duty to Provide Information

1. The permittee shall furnish to the board any information which the board may request to determine whether cause exists for modifying, revoking, reissuing or terminating the VWP permit, or to determine compliance with the VWP permit. The permittee shall also furnish to the board, upon request, copies of records required to be kept by the permittee.
2. Plans, specifications, maps, conceptual reports and other relevant information shall be submitted as required by the board prior to commencing construction.

G. Monitoring and Records Requirements

1. Monitoring of parameters, other than pollutants, shall be conducted according to approved analytical methods as specified in the VWP permit. Analysis of pollutants will be conducted according to 40 CFR Part 136 (2000), Guidelines Establishing Test Procedures for the Analysis of Pollutants.
2. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.
3. The permittee shall retain records of all monitoring information, including all calibration and maintenance records and all original strip chart or electronic recordings for continuous monitoring instrumentation, copies of all reports required by the VWP permit, and records of all data used to complete the application for the VWP permit, for a period of at least three years from the date of the expiration of a granted VWP permit. This period may be extended by request of the board at any time.
4. Records of monitoring information shall include:
 - a. The date, exact place and time of sampling or measurements;
 - b. The name of the individuals who performed the sampling or measurements;
 - c. The date and time the analyses were performed;

- d. The name of the individuals who performed the analyses;
- e. The analytical techniques or methods supporting the information such as observations, readings, calculations and bench data used;
- f. The results of such analyses; and
- g. Chain of custody documentation.

H. Transferability

This VWP permit may be transferred to a new permittee only by modification to reflect the transfer, by revoking and reissuing the permit, or by automatic transfer. Automatic transfer to a new permittee shall occur if:

- 1. The current permittee notifies the board within 30 days of the proposed transfer of the title to the facility or property;
- 2. The notice to the board includes a written agreement between the existing and proposed permittee containing a specific date of transfer of VWP permit responsibility, coverage and liability to the new permittee, or that the existing permittee will retain such responsibility, coverage, or liability, including liability for compliance with the requirements of any enforcement activities related to the permitted activity; and
- 3. The board does not within the 30-day time period notify the existing permittee and the new permittee of its intent to modify or revoke and reissue the VWP permit.

I. Property rights

The issuance of this permit does not convey any property rights in either real or personal property, or any exclusive privileges, nor does it authorize injury to private property or any invasion of personal rights or any infringement of federal, state or local law or regulation.

J. Reopener

Each VWP permit shall have a condition allowing the reopening of the VWP permit for the purpose of modifying the conditions of the VWP permit to meet new regulatory standards duly adopted by the board. Cause for reopening VWP permits includes, but is not limited to when the circumstances on which the previous VWP permit was based have materially and substantially changed, or special studies conducted by the board or the permittee show material and substantial change, since the time the VWP permit was issued and thereby constitute cause for VWP permit modification or revocation and reissuance.

K. Compliance with State and Federal Law

Compliance with this VWP permit constitutes compliance with the VWP permit requirements of the State Water Control Law. Nothing in this VWP permit shall be construed to preclude the institution of any legal action under or relieve the permittee from any responsibilities, liabilities, or other penalties established pursuant to any other state law or regulation or under the authority preserved by § 510 of the Clean Water Act.

L. Severability

The provisions of this VWP permit are severable.

M. Permit Modification

A VWP permit may be modified, but not revoked and reissued except when the permittee agrees or requests, when any of the following developments occur:

1. When additions or alterations have been made to the affected facility or activity which require the application of VWP permit conditions that differ from those of the existing VWP permit or are absent from it;
2. When new information becomes available about the operation or activity covered by the VWP permit which was not available at VWP permit issuance and would have justified the application of different VWP permit conditions at the time of VWP permit issuance;
3. When a change is made in the promulgated standards or regulations on which the VWP permit was based;
4. When it becomes necessary to change final dates in schedules due to circumstances over which the permittee has little or no control such as acts of God, materials shortages, etc. However, in no case may a compliance schedule be modified to extend beyond any applicable statutory deadline of the Act;
5. When changes occur which are subject to "reopener clauses" in the VWP permit; or
6. When the board determines that minimum instream flow levels resulting from the permittee's withdrawal of water are detrimental to the instream beneficial use and the withdrawal of water should be subject to further net limitations or when an area is declared a Surface Water Management Area pursuant to §§ 62.1-242 through 62.1-253 of the Code of Virginia, during the term of the VWP permit.

N. Permit Termination

After notice and opportunity for a formal hearing pursuant to Procedural Rule No. 1 (9 VAC 25-230-100) a VWP permit can be terminated for cause. Causes for termination are as follows:

1. Noncompliance by the permittee with any condition of the VWP permit;
2. The permittee's failure in the application or during the VWP permit issuance process to disclose fully all relevant facts or the permittee's misrepresentation of any relevant facts at any time;
3. The permittee's violation of a special or judicial order;
4. A determination by the board that the permitted activity endangers human health or the environment and can be regulated to acceptable levels by VWP permit modification or termination;
5. A change in any condition that requires either a temporary or permanent reduction or elimination of any activity controlled by the VWP permit; and
6. A determination that the permitted activity has ceased and that the compensatory mitigation for unavoidable adverse impacts has been successfully completed.

O. Civil and Criminal Liability

Nothing in this VWP permit shall be construed to relieve the permittee from civil and criminal penalties for noncompliance.

P. Oil and Hazardous Substance Liability

Nothing in this VWP permit shall be construed to preclude the institution of legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under § 311 of the Clean Water Act or §§ 62.1-44.34:14 through 62.1-44.34:23 of the State Water Control Law.

Q. Unauthorized Discharge of Pollutants

Except in compliance with this VWP permit, it shall be unlawful for the permittee to:

1. Discharge into state waters sewage, industrial wastes, other wastes, or any noxious or deleterious substances;
2. Excavate in a wetland;
3. Otherwise alter the physical, chemical, or biological properties of state waters and make them detrimental to the public health, to animal or aquatic life, to the uses of such waters for domestic or industrial consumption, for recreation, or for other uses;
4. On or after October 1, 2001 conduct the following activities in a wetland:

- a. New activities to cause draining that significantly alters or degrades existing wetland acreage or functions;
- b. Filling or dumping;
- c. Permanent flooding or impounding;
- d. New activities that cause significant alteration or degradation of existing wetland acreage or functions.

R. Permit Extension

Any permittee with an effective VWP permit for an activity that is expected to continue after the expiration date of the VWP permit, without any change in the activity authorized by the VWP permit, shall submit written notification requesting an extension. The permittee must file the request prior to the expiration date of the VWP permit. Under no circumstances will the extension be granted for more than 15 years beyond the original effective date of the VWP permit. If the request for extension is denied, the VWP permit will still expire on its original date and, therefore, care should be taken to allow for sufficient time for the board to evaluate the extension request and to process a full VWP permit modification, if required.

Mandatory Non-essential Water Use Restrictions

The following non-essential water uses will be prohibited during periods of declared drought emergencies. Please note the exceptions that follow each prohibited use. These prohibitions and exceptions will apply to uses from all sources of water and will only be effective when the Governor of Virginia declares a Drought Emergency through the issuance of an executive order.

Unrestricted irrigation of golf courses is prohibited.

- Tees and greens may be irrigated between the hours of 9:00 p.m. and 10:00 a.m. at the minimum rate necessary.
- Localized dry areas may be irrigated with a hand held container or hand held hose equipped with an automatic shutoff device at the minimum rate necessary.
- Greens may be cooled by syringing or by the application of water with a hand held hose equipped with an automatic shutoff device at the minimum rate necessary.
- Fairways may be irrigated between the hours of 9:00 p.m. and 10:00 a.m. at the minimum rate necessary not to exceed one inch of applied water in any ten-day period.
- Fairways, tees and greens may be irrigated during necessary overseeding or resodding operations in September and October at the minimum rate necessary. Irrigation rates during this restoration period may not exceed one inch of applied water in any seven-day period.
- Newly constructed fairways, tees and greens and areas that are re-established by sprigging or sodding may be irrigated at the minimum rate necessary not to exceed one inch of applied water in any seven-day period for a total period that does not exceed 60 days.
- Fairways, tees and greens may be irrigated without regard to the restrictions listed above so long as:
 - The only water sources utilized are water features whose primary purpose is stormwater management,
 - Any water features utilized do not impound permanent streams,
 - During declared Drought Emergencies these water features receive no recharge from other water sources such as ground water wells, surface water intakes, or sources of public water supply, and,
 - All irrigation occurs between 9:00 p.m. and 10:00 a.m.
- All allowed golf course irrigation must be applied in a manner to assure that no runoff, puddling or excessive watering occurs.
- Rough areas may not be irrigated.
